Preparing the Next Generation of Healthcare Providers

The Lakota Local School District, in partnership with Cincinnati Children’s Medical Center Liberty Campus, is proud to offer a unique field experience program for high school students.

To support student talent and promote regional workforce development, select students will have the opportunity to gain learning experience in pediatric medical care. Following the orientation and rotations in varying specializations, students will be in a better position to take the next step in their college and career planning.

How does the program work?
Over the course of one week, selected students rotate among five different departments, gaining hands-on experience among professionals in each field. Each rotation lasts four hours and is completed at the Liberty Campus of Cincinnati Children’s Hospital Medical Center.

Who can participate?
Any high school junior or senior is eligible to apply. Five students meeting the criteria will be selected to participate in the program, all of whom must commit to all program dates.

What will I learn?
Each participant will gain experience in hospital-related fields ranging from imaging and pharmacy to surgery, rehab services and more.

When do I start?
See the timeline to the right for important dates about this internship opportunity.

Additional questions?

How do I apply?
Visit the Lakota East or Lakota West website for a more detailed description of the learning experience, as well as the student application.

The application deadline is March 3, 2017.
