STEAM²: YOUR PATHWAY TO THE FUTURE

Design & Modeling

7th Grade

What if
there was
a class
where
CURIOSITY
ruled?

There is...

STEAM²: WHERE CURIOSITY RULES

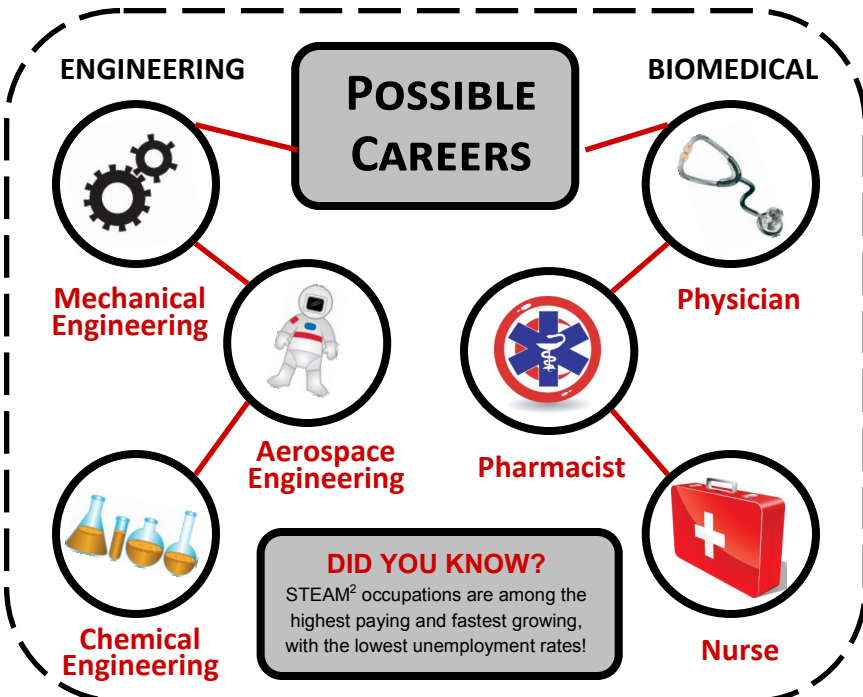

What if there was a class where you learned not only how things worked, but how you might make them better? Where the biggest challenge was between you and your imagination?

At Lakota, there are several such classes—and they're all part of an innovative series called STEAM², standing for Science, Technology, Engineering, Applied Arts/Design, Mathematics and Medical.

By continuing down this path, you will have the opportunity to explore life-changing innovations taking place in labs, test tubes and computer screens around the world—right in your own classroom.

So, get ready, get set—the adventure has just begun!

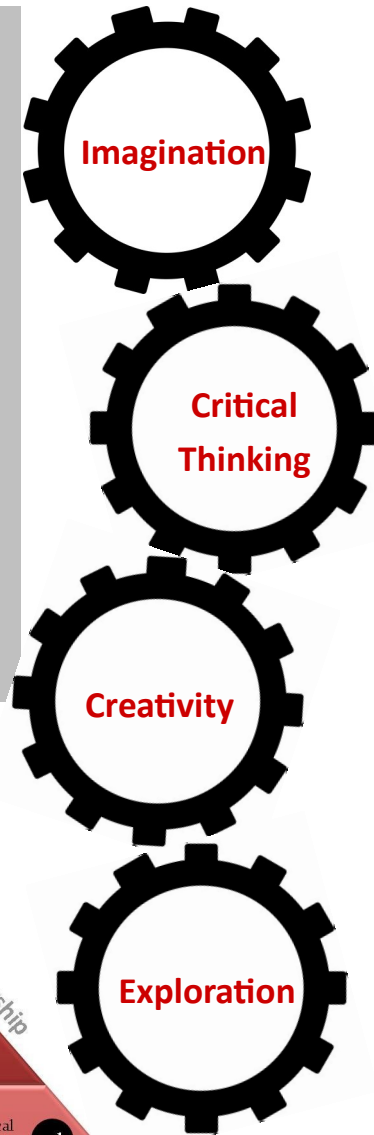

DESIGN & MODELING

7th Grade

- ◆ Use the design process to solve problems and understand the influence that creative and innovative design has on our lives.
- ◆ Use industry standard 3D modeling software to create a virtual image of designs.
- ◆ Produce a portfolio to showcase student creative solutions.

Build a foundation in one of the most vital fields of learning and essential professions needed in the world today and tomorrow.

STEAM²: The Big Picture
